Summary

Detail-oriented Flutter Developer experienced in architecting modular mobile, web, and desktop solutions. Proficient in Dart and advanced state management (BLoC/Cubit) with a strong commitment to Clean Code and SOLID principles. Proven ability to translate complex designs into high-fidelity interfaces while ensuring robust API integration and performance optimization. Dedicated to continuous learning and implementing industry-standard software patterns.

Education

Suez Canal University

Expected Jun 2027

Bachelor of Science (B.Sc.) in Computer Science

Year: Third

Gained a strong theoretical and practical foundation in computer science with a focus on software engineering and application development.

Experience

Flutter Training

Jul 2025

KAAF | Creativa Innovation Hub – Ismailia

- Built cross-platform mobile applications using Flutter and Dart, focusing on clean, maintainable code and reusable components.
- Applied Object-Oriented Programming (OOP) principles and implemented responsive UI designs suitable for various screen sizes.
- Participated in hands-on projects that simulated real-world app development workflows, enhancing problem-solving and product-oriented thinking.

Projects

Hungry (E-Commerce Food App)

[Link](#)

- Architected a scalable system using **Feature-Driven Clean Architecture** and **SOLID principles**.
- Implemented the **Repository Pattern** for data abstraction and utilized **get_it** for Dependency Injection.
- Developed full commerce workflows with **robust API error handling** and state management using **BLoC/Cubit**.
- Integrated RESTful APIs ensuring seamless data flow and high-performance user experience.

Donors Management System (Flutter Desktop)

[Link](#)

- Developed a desktop application using **MVVM** and **Feature-Driven** architecture, adhering to **SOLID**.
- Integrated **Dependency Injection** and implemented **comprehensive error handling** for data persistence and API tracking.
- Designed intuitive administrative dashboards focusing on data integrity and optimized desktop performance.

Bookly (E-Book Store)

[Link](#)

- Built an e-book app with Clean Architecture, featuring **robust error handling** and Dio for network layers.
- Leveraged BLoC for state management and integrated image caching to enhance performance.
- Delivered a responsive UI with smooth animations and Hero transitions for a premium reading experience.

Student Information System (Flutter Desktop)

[Link](#)

- Developed a Windows desktop app managing **500+ student records** with a custom file-based storage
- Built an interactive **analytics dashboard** with real-time statistics, complete **CRUD operations**, and data export functionality.
- Achieved **95+ code quality score** through MVVM + Cubit architecture with clean, maintainable code.

Open Fashion (E-Store)

[Link](#)

- Developed a pixel-perfect UI from Figma designs, focusing on high-performance reusable custom widgets.
- Managed app state using Provider and implemented smooth animations for a premium user experience.

Skills

Languages: Dart | C# | C++ | Python | SQL
Mobile Development: Flutter (Mobile & Desktop) | BLoC | Cubit | Provider | Dio | get_it (Dependency Injection)
Architecture & Design Patterns: Clean Architecture (Feature-Driven) | MVVM | MVC | Repository Pattern| SOLID Principles| Dependency Injection| OOP
API Integration & Networking: RESTful APIs | Dio HTTP Client | Error Handling (Network, Server, Unexpected) | API Service Layer | Image Caching
Databases & Storage: MS SQL Server | SQLite (sqflite) | Firebase | Shared Preferences
Tools & Platforms: Git | GitHub | Postman | Android Studio | VS Code | Figma | Trello
Soft Skills: Problem-Solving | Self-Learning | Technical Communication | Code Review | Attention to Detail | Adaptability

Certifications

• Deep Dive into Clean Architecture in Flutter – Udemy	View Credential
• Advanced Flutter Course: BLoC and MVVM Pattern – Udemy	View Credential
• Sprints x Microsoft Summer Camp: Mobile Development – Sprints	View Credential
• Sprints x Microsoft Summer Camp: UI/UX Design – Sprints	View Credential
• Mobile App Development with Flutter (81.5 Hours) – Udemy	View Credential
• Mobile App Development Training – Creativa Innovation Hub	View Credential
• Database Systems (SQL, NoSQL, MongoDB) – Manara	View Credential
