Summary

Passionate Flutter Developer driven by transforming creative ideas into elegant, high-performance applications. Specializes in building intuitive user experiences that are functional and delightful across both iOS and Android. Possesses a strong foundation in Flutter and Dart, with expertise in implementing Clean Architecture, Responsive UI, and API integrations to deliver efficient, scalable apps. Committed to writing clean, maintainable code while focusing on the end-user experience.

Education

Suez Canal University

Expected Jun 2027

Bachelor of Science (B.Sc.) in Computer Science

Year: Third

Gained a strong theoretical and practical foundation in computer science with a focus on software engineering and application development.

Experience

Mobile Development Intern

Jul 2025

Creativa Innovation Hub – Ismailia

- Contributed to a key mobile application by developing 3+ core features, including secure user authentication and profile management.
- Designed and implemented responsive UI for over 8 application screens, ensuring a consistent and intuitive experience across various device sizes.
- Addressed over 15 tickets for bug fixes and minor feature enhancements, contributing to improved application stability and user experience.
- Collaborated within a team of 4 interns and mentors, actively participating in code reviews to improve code quality and maintain project standards.

Projects

Hungry App

[Link](#)

- Engineered a scalable app with 15+ screens using Clean Architecture and the BLoC pattern for robust state management.
- Implemented a complete user flow with authentication, a multi-step cart, and order submission.
- Integrated 5+ RESTful API endpoints for live data, with a dynamic search and filtering feature.
- Ensured a consistent and responsive UI across a wide range of mobile and tablet screen sizes.

Open Fashion (E-Store App)

[Link](#)

- Developed a high-fidelity UI clone from a Figma design with 10+ screens, including a dynamic home page and product details.
- Created a library of 20+ reusable custom widgets to ensure code reusability and design consistency.
- Leveraged the Provider package for efficient UI state management, such as updating the shopping cart.
- Implemented smooth, high-performance animations and transitions to enhance the user experience.

Library Management System (University Project)

[Link](#)

- Designed a robust console app in C++, applying OOP principles with classes for 'Book', 'Member', and 'Transaction'.
- Implemented 5+ core functionalities including inventory search, member registration, and check-outs/returns.
- Engineered a data persistence mechanism using file I/O to manage records for over 500 books and 100+ members.
- Incorporated robust input validation and error handling to ensure a reliable console experience.

Skills

Programming Languages: Dart | C# | C++ | Python | SQL | SQLite

Framework State Management: Flutter | BLoC | Cubit | Provider

Key Libraries Packages: Firebase | Sqflite | flutter_localizations | flutter_screenutil | shared_preferences

Architecture Principles: Clean Architecture | MVVM | SOLID Principles

Backend APIs: Firebase (Firestore, Auth, Storage) | REST APIs | JSON

Testing: Unit Testing | Widget Testing

Tools Platforms: Git | GitHub | Postman | Android Studio | VS Code | Figma | Adobe Illustrator

UI/UX: Material Design | Cupertino Widgets | Animations | Localization (l10n) | Responsive & Adaptive UI

Soft Skills: Problem-Solving | Team Collaboration | Communication | Adaptability | Leadership | Attention to Detail

Certifications

Mobile App Development With Flutter (*Sprints x Microsoft*)

UI/UX Design (*Sprints x Microsoft*)

Mobile App Development with Flutter (*Udemy, 81 Hours*)

Mobile App Development with Flutter (*Creativa Innovation Hub*)

Mastering Object-Oriented Programming (OOP) using C++ (*MaharaTech*)

The Principles of Writing Clean Code (*MaharaTech*)

Git and GitHub (*Almdrasa*)
