Summary

Flutter Developer focused on building scalable cross-platform mobile and desktop applications using Flutter and Dart. Experienced with Clean Architecture, BLoC/Cubit, REST APIs, and responsive UI development. Currently expanding backend development skills with .NET.

Education

Suez Canal University

Jan 2023 – Expected Jun 2027

Bachelor of Science in Computer Science

Third Year

Built a strong foundation in computer science, software engineering and application development.

Experience

Mobile Development Track Organizer (Volunteer)

Apr 2026 – Present

GDG – Suez Canal University (Remote)

- Supported participants in Flutter development, state management, API integration, and responsive UI — reviewing assignments and providing technical feedback.
- Collaborated with the core team to organize workshops and hands-on sessions, contributing to track planning and content preparation.

Flutter Developer Intern

Nov 2025 – Jan 2026

Com Fab – Egypt (Remote)

- Structured a multi-module Flutter application (e-commerce, chat, donation, support systems) with scalable architecture and UI/UX design.
- Contributed to MVP planning, feature prioritization, and future enhancements (notifications, localization).

Flutter Developer Trainee

Jul 2025

Creativa Innovation Hub – Ismailia (On-site)

- Built cross-platform Flutter applications applying OOP, reusable widgets, and responsive UI principles.
- Participated in hands-on projects simulating real-world development workflows.

Projects

Donation Management System (Flutter Multi-Platform Application)

- Developed a **scalable multi-platform Flutter application** including a desktop admin panel and mobile donor app.
- Desktop Application (Admin Panel)** GitHub
 - Developed **10+ desktop screens** for managing donors, cases, and operations.
 - Integrated **30+ RESTful API endpoints** ensuring efficient data handling and communication.
 - Built analytics dashboards and implemented advanced UI features (animations, shimmer, responsive layouts, filtering).
- Mobile Application (Donor Side)** GitHub
 - Developed a **feature-rich Flutter app (12+ screens)** including authentication, donation flows, and case tracking.
 - Designed modern UI/UX with **animations, parallax, shimmer, and responsive layouts**.
 - Structured the app using **BLoC/Cubit** with a modular, API-ready architecture for future backend integration.

Hungry – E-Commerce Food App

GitHub

- Developed a **Flutter e-commerce app UI (10+ screens)** with product browsing, cart, and checkout.
- Implemented **authentication, token management, search, and filtering**.
- Built scalable architecture using **Clean Architecture and BLoC/Cubit**, ready for backend integration.

Bookly – E-Book Store

GitHub

- Developed a Flutter-based e-book application with **5+ screens integrating Google Books API** for real-time book data, search, and browsing.
- Built the app using **MVVM, BLoC/Cubit**, and Dio with robust API integration, error handling, and image caching.
- Designed a responsive UI with **animations, Hero transitions**, and smooth user experience across different devices.

Skills

Programming Languages: Dart, C#, C++, Python, SQL

Flutter: Mobile & Desktop, State Management (BLoC, Cubit), Responsive UI, Animations, Theming

Architecture: Clean Architecture, MVVM, SOLID, OOP

Backend Integration: RESTful APIs, Token-based Auth, Dio, Error Handling

Tools: Git, GitHub, Postman, Android Studio, VS Code, Figma

Soft Skills: Problem Solving, Code Review, Technical Communication, Attention to Detail

Certifications

• Deep Dive into Clean Architecture in Flutter – Udemy	Credential
• Advanced Flutter Course: BLoC and MVVM Pattern – Udemy	Credential
• Sprints x Microsoft Summer Camp: Mobile Development – Sprints	Credential
• Mobile App Development Training – Creativa Innovation Hub	Credential
• Database Systems: SQL, NoSQL – Manara	Credential

Languages

Arabic: Native
English: Professional Working Proficiency
